Support – \$15 Million Ongoing Funding for Domestic and Sexual Violence Prevention

Dear Budget Leaders,

We, the undersigned organizations, urge you to include \$15 million in ongoing funds in the FY 21-22 budget for sexual and domestic violence prevention programs administered by the Governor's Office of Emergency Services (Cal OES) through a competitive grant process. The state budget has previously allocated one-time funding for this purpose in the FY 18-19 and FY 19-20 budgets. Those funds will be fully expended by April 30, 2021 and without further investment, prevention efforts will cease in many parts of the state.

This pandemic has brought light to a crisis within a crisis - the stressors and dynamics related to COVID-19 have increased the rates and severity of domestic violence and sexual abuse. This does not need to be an inevitable element of our state's reality, and without an ongoing state investment in prevention, high rates of tragedy and trauma will persist.

Recent research is confirming that domestic violence and sexual abuse increased during the stay at home orders. Globally more than 3 in 5 (63%) domestic violence organizations said that demand for services escalated.¹ Police data across US cities indicated a 10-27% increase in domestic violence while stay-at-home orders were implemented.² As just one example from here in California, Human Options, a domestic violence resource center, reported that calls doubled primarily for legal advocacy such as visitation custody, and there was a 100% increase in requests for food and other basic needs during the first two weeks of coronavirus-related shutdowns. They also saw a 50% increase in requests for parenting classes and the personal empowerment program.³

If healthy relationship and consent skills were built into the fabric of Californians' lives, we could avoid the devastating outcomes we currently see. There is a growing evidence base of what works to truly prevent violence and abuse, and thanks to prior one-time investments organizations across California have been implementing a range of prevention efforts. However, as those one-time dollars are expended, these prevention efforts will come to a halt.

FY 2020-21 Request

We respectfully request \$15 million in ongoing funds dedicated to supporting community based prevention. With a per-project grant award of \$150,000 per year, this request could fund approximately 100 community-based prevention programs, truly allowing prevention to reach across California.

State spending on prevention is especially critical since the federal funding sources to address domestic and sexual violence that are administered through Cal OES are heavily focused on crisis intervention victim services. The largest federal funding source, the Victims of Crime Act (VOCA), expressly prohibits funds from being used for prevention efforts. The Violence Against Women Act (VAWA) STOP formula grant and the Family Violence Prevention and Services Act (FVPSA) grants cap prevention at 5 and 25 percent, respectively. **Without state investment, we will make no meaningful progress in preventing these types of harms.**

Prior One-Time Funding Allocations

In 2018, the state budget included \$10 million in one-time funding for domestic and sexual violence prevention, which was split evenly between the Family Violence Prevention grant program, and the Rape Crisis Center program. This funded fourteen organizations for domestic violence prevention through a competitive grant, and provided new funding for each Rape Crisis Center to incorporate prevention into their work.

In 2019, the state budget included \$5 million in one-time funding for domestic and sexual violence prevention. This funded 32 domestic and sexual violence programs at \$150,000 for a one-year project period, May 2020 through April 2021.

In 2020 the state budget did not include any funding for prevention. As a result, by the time the June budget passes, many funded prevention efforts will have stopped entirely or dramatically scaled back. It is critical that we re-invest in prevention and commit to ongoing funding that allows programs the ability to plan, hire staff, and focus on the long-term societal change that is so desperately needed.

Background information on the need for prevention

According to the U.S. Centers for Disease Control and Prevention, an estimated 3.3 million California women and men experience intimate partner violence each year.⁴ In 2012 alone, an estimated 948,000 California residents were sexually assaulted. However, given that some victims were assaulted repeatedly during the year, the total estimated incidences of sexual assault is 1.1 million.⁵ The costs of sexual and domestic violence are astronomical: sexual violence costs the state of California \$140 billion annually⁶ and the lifetime economic burden of domestic violence in California is nearly \$400 billion.⁷

It's time for California to invest in prevention to stop future incidences of sexual violence and reduce the costs of sexual and domestic violence to victims, and our communities. Prevention works by teaching safe and healthy relationship skills to school-age youth, improving school climates and safety with peer-led programs, shifting

culture by engaging boys and men in gender equity, and promoting racial justice with culturally responsive solutions. Changing the conditions and norms that allow sexual and domestic violence to occur will take time. Thriving communities and healthy relationships can prevail over sexual and domestic violence if we sustain these efforts.

Using prior years' domestic and sexual violence prevention funding, programs have:

- Increased their capacity to provide healthy relationship educational workshops.
- Provided outreach and training to local correctional facilities in order to expand services to incarcerated survivors.
- Expanded empowerment self-defense and trauma-informed rape prevention education workshops.
- Implemented a nationally recognized curriculum to engage men and boys as allies in prevention and promote healthy, respectful manhood.
- Expanded outreach to focus on at-risk, homeless & runaway youth.
- Developed inclusive queer and trans youth outreach.
- Expanded their already successful youth leadership work to additional schools and college campuses.
- Implemented Athletes As Leaders, which empowers high school female student athletes to take an active role in promoting healthy relationships and ending sexual violence.
- Developed prevention curricula that is culturally sensitive to Spanish speaking populations, and provided California certification Sexual Assault Counselor trainings in Spanish.
- Engaged LGBTQIA+ youth and adults to enhance peer knowledge of healthy relationships and bystander empowerment.
- Adapted programs to reach parents and youth through online virtual spaces and provide virtual trainings.

Now is the time to prioritize prevention and build upon the existing groundwork and momentum to end sexual and domestic violence. For these reasons, we, the undersigned organizations, respectfully request that you consider this budget allocation of \$15 million.
